Dorsa Abrishami

+1 571–519–9027 dorsaabrishami96@gmail.com DorsaAbrishami Dorsa Abrishami

Highlights of Qualifications

- **Master's graduate in Information Systems** specializing in **data analytics**, transforming raw data into decision-ready insights that drive operational efficiency and strategic decision-making.
- **Proficient in Excel, Python, SQL, and n8n** for data cleaning, exploratory analysis, reporting, automation, and dashboard development, with hands-on experience.
- Skilled in **visualizing data and translating** it into compelling narratives for stakeholders through dynamic **Tableau** dashboards and strong **communication skills**.

Education

- **Master of Science in Information Systems** (United States – Virginia) **George Mason University - CEC**
  GPA: 3.8/4 *01/2024 – 12/2025*
- Bachelor of Food Science and Technology (Tehran – Iran) *Azad University*
  09/2014 – 07/2019

Technical Projects

Drug Data Analysis *12/2025*
Analyzed FDA drug approval data using Python and Amazon S3, uncovering key trends in regulatory designations, patient reach, and manufacturer activity.

- **California Hospitals Analysis and Visualization in Tableau** *06/2025*
  Leveraged SQL and ETL workflows to analyze risk-adjusted inpatient mortality and quality ratings across 528 California hospitals. Built dynamic Tableau dashboards highlighting performance, regional trends, and procedure-level outcomes to drive actionable insights.
- **Nurse Stress Prediction Using Wearable Sensors** *06/2025*
  Built ML models in Python (decision trees, XGBoost) to predict nurse stress from wearable time-series data (HR, HRV, temperature, activity). Cleaned and engineered noisy physiological data, applied statistical analysis, and translated results into clear reports and actionable healthcare insights.

British Airways Review *02/2025*
Created an interactive multi-dimensional Tableau dashboard combining time-series, geographic, and categorical analysis to assess airline customer review data.

Airbnb *01/2025*
Analyzed housing market trends using Tableau by comparing average prices across bedroom counts, ZIP codes, and monthly revenue patterns.

Professional Experience

Business Data Analyst (Faraman Dairy Factory) - Iran (Tehran) *06/2020 – 05/2021*

- Designed and delivered weekly KPI summary reports to the CEO using **Python and Excel**, tracking financial, inventory, and quality metrics and reducing reporting time by 90%.
- Collaborated across production and quality teams as a key **cross-functional liaison**, automating data analysis and reporting processes using Python through **ERP systems**, streamlining workflows and reducing processing time by 70%.
- Conducted ad hoc analyses using Python and Excel, including product-level waste pattern analysis, to identify high-loss items and reduce waste by 30%.

Dental Assistant (Heartland Dental) - United States (Virginia) *10/2022 – 09/2024*

- Supported dentists in a **fast-paced environment** while assisting with patient care, maintaining efficient clinical workflows, and handling protected health information (PHI) in compliance with HIPAA and organizational information policies.

Technical Skills

- **Programming:** Python (Pandas, NumPy, Matplotlib ,Seaborn, Scikit-learn, Pytorch), SQL, R, Java(familiar)
- **Data Tools:** Excel, Google Sheets, Amazon S3, AWS Redshift, GCP, MySQL, MongoDB
- **Data Visualization:** Tableau, Power BI
- **Automation:** n8n, Google Workspace Studio
- **AI Tools:** Cursor, Claude Code, NotebookLM
- **Other:** SAP, Version Control (Git/GitHub), Github Actions, CLI tools

Certificates

Google Data Analytics by Google *Ongoing*
AWS Academy Graduate – Data Engineering by Amazon Web Services *12/2025*
AWS Academy Graduate – Cloud Foundations by Amazon Web Services *12/2025*
